

## Updated Schedule of Fees Effective 1st July 2026

Due to rising business costs and to keep pace with inflation, our out of pocket fees will increase from 1st July.

The indexation of Medicare rebates has not kept up with inflation and so to continue to make our General Practice clinic viable we unfortunately need to increase our gap payments.

We will absorb the credit and debit card surcharge from 1st July, so card payments will no longer attract a card surcharge.

*Thank you for your understanding.*
